

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 7, line 19 as follows:

Figure 5 illustrates one lateral side of the window frame. Each frame member 12 has a pair of vertical channels ~~[[72]]~~ 73 that allow the sashes (not shown) to travel therein. A pair of pulleys 48 and 50 are mounted against the exposed interior surface of each vertical frame member 12. Each cable 46 is routed over the corresponding pair of pulleys. One end of each of the cables 46 attaches to a lateral side of the lower sash while the other end of each of the cables 46 attaches to a lateral side of the upper sash.
